Dear Hiring Manager,
Thank you for the opportunity to apply for the Software Engineer Intern role at your company. After reviewing your job description, I am certain that I have the necessary skills to successfully do the job adeptly and perform above expectations.

I am an ambitious college student (3.901 GPA, BSE in Computer Science, minor in Business) currently attending the University of Michigan, expected to graduate in April of 2023. During the course of my academic career, I managed to accrue multiple internship experiences, interning as a software engineer for large tech companies like Lenovo and ASUS. I am proficient in multiple programming languages such as Python, C/C++, Java, JavaScript, HTML, and CSS. I also have a wide array of avant-garde technical skills such as Docker, PostgreSQL, Microsoft Azure, and continuous integration/ development.

In both my academic and professional life, I have tackled challenges with what I like to call the Super Mario mindset. Whenever I encounter a complicated challenge, I keep going at it and learning from my failures. Whether working on academic, extracurricular, or professional projects, I apply this resolve with my problem-solving, creative thinking, and teamwork skills, which I believe will help me succeed as a Software Engineer Intern at your company.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I look forward to elaborating on how my specific skills and abilities will benefit your organization. Please contact me via email at brianc.boston@gmail.com to arrange a convenient meeting time for technical interviews. Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,
Brian Ying-Chi Chen
